Important remarks / explanatory notes:

- (1) Capacity including Humidity Factor
- (2) Fluid group 2 according to pressure equipment directive 2014/68/EU
- (3) According to the enveloping surface method defined in EN 13487/EN 9614-1; Eurovent tolerance = +2 dB(A). Applies only for AC fans, AC fans with sine control and EC fans. Noise caused by other control methods, water spraying systems or sound reflexions occurring at the installation site are not taken into account and may result in an increased sound pressure level.
- (4) Distance at which an air velocity of 0.5 m/s can still be measured isothermally in an ideal space. The achievable penetration depth of the air flow in the cold room depends on the spatial geometry and other factors.
- (5) The current consumption can differ in dependence of the air temperature and of the variations of system voltage according to the VDE guidance.
- (6) This unit is equipped with fans that are not subject to Directive 2009/125/EC (ErP Directive).
- (7) The unit may not be suitable for very corrosive atmospheres (close to shores, in smoke rooms, etc.). For further information see program menu "?", "Material recommendations brochure", or ask your sales partner.
- (8) Dimensions and weights are not valid for all possible options! They may differ for units with accessories or special units (S-...).
- (9) Piping (DN = 20.0 mm, TSmax = 100 °C, gaseous). Final classification according to pressure equipment directive 2014/68/EU during order processing.
- (10) Fuse protection according to connected load on connection diagram, max. 25 A
- (11) Set comprises heating elements for coil and tray, terminal box, breaker strip, consumables.
